

PREPARING TODAY'S STUDENTS FOR TOMORROW'S ENERGY NEEDS

MEAD ENERGY EXPO

OPEN TO THE PUBLIC | MEAD HIGH SCHOOL
THURSDAY, APRIL 25, 4:00 - 6:00 P.M.

JOIN US!

Students from Mead Elementary, Mead Middle, and Mead High School will showcase their energy projects at the second annual Mead Energy Expo. St. Vrain families are invited to engage in these interactive presentations and learn about the Mead High School Energy Academy.

Local industry partners will be present to answer questions about today's energy field and their participation in the Energy Academy.

ABOUT THE ENERGY ACADEMY

The Mead Energy Academy, in partnership with Mead Elementary and Middle School, equips future leaders to be innovators in an increasingly diverse energy industry. Along with rigorous coursework, Mead Energy Academy seniors design and complete a capstone project. During the capstone experience, students interact with energy professionals, apply modern technology in their design project, and develop skills needed in the workplace.
